

Mojn! (or Hello, as most would say 😊)

My name is Nikolai, and I just joined the most awesome team in at Umbraco HQ! 😊😊

I am a 27 year old man originally from Sønderborg, Als. Today I am studying on my last year on the masters of Software Engineering at the University of Southern Denmark (SDU, Odense). I am a commuter as I am currently located in Kolding with my beautiful fiancé. Most of the time I am a huge nerd 😎 ; I love to code 🚧 , solve problems, and make things. However, I also have very social side, where I love meeting new people, enjoy a cold beer, or sail 150km (Gudenåen) in 3 days in a canoe with my cousin! 🛶🍻

Why Software? Thats nerdy?!

Coding and software development is an unexpected journey to me. A few years back (5 years to be exact) I knew nothing of coding. I was interested in religion, running, rock climbing and fishing, and I was studying nano-technology in Aalborg. As I was trying to find a profession that interested me, I quite randomly fell over software development one summer. I quickly found that I had a flair for programming, and that it was super fun! Today it is one my greatest passions, and I use way to much time starting new nerdy projects, and following different cool open-source projects. From my short amount of time learning software development I have learned that if you put your mind to it, you can accomplish anything! 😊

Who am I really? 🥺

I am a huge family person, and I am blessed to have 4 nephews, that are the coolest boys in the world! I strive to be the fun uncle, and being around them is a priority of mine. Below is picture of me and my oldest nephew in the cinema!

My personal interests are running 🏃, fishing 🎣, travelling ✈️, and playing video games 🎮. Currently I am trying to beat Elden Ring, but that game is enormous, and it is very hard! I am not sure if I will ever get there, but luckily, I have a friend who is a gamer too, and he is also a big fan of the game, so we try to beat it together.

Fishing and travelling is something I really want to do more often, but studying is hard work, and it is not often I find the time to do it. I love the nature and I am looking forward to finishing my degree in software engineering, so I can enjoy more good fishing trips with friends.

Why Umbraco?

Well.. Umbraco is an awesome company! Umbraco has a lot of amazing people, and one more now that I am a member of the team! I am a huge fan of the company, because they create open-source software, and I know for fact that it requires passion and hard work.

Besides that Umbraco focuses on creating software that is simple to use, both for developers and platform users. Making software that other people can understand and use is something I really find meaning in.

I look forward to working more with Umbraco in the future, and grow with the team!
